ABOUT US

Intellectual Concepts LLC (IC) is a woman owned company with offices in Atlanta, Birmingham, and Baton Rouge. Activities that impact human health, the natural and build environment that takes into consideration that some communities are disproportionately impacted by pollution, flooding, drought, and climate change. Consistent with our mission to improve the quality of life for all, Intellectual Concepts helps government agencies and impacted communities understand and address these inequities. We apply our expertise to identify and analyze disproportionate impacts. We also bring community engagement and communication specialists to build stakeholder relationships, share information, and facilitate public participation in the decision-making process. Our work helps agencies and communities achieve fair treatment and meaningful involvement when developing and implementing environmental projects, policies, and regulations.
